

## Daily Necessities and Bathroom Accessories

METALLECA® Daily Necessities and Bathroom Accessories are formed by presses and molds to apply external force to plates, strips, pipes and profiles that result in plastic deformation or separation. Then, the stamping pieces acquire the needs of shape and size.

With the rapid development of technology and improvement of equipment requirement, the demand for precision accuracy stamping pieces is increasing and the applications are getting wider.

## Product Description

As a professional high quality METALLECA® Daily Necessities and Bathroom Accessories manufacture, you can rest assured to buy Daily Necessities and Bathroom Accessories from our factory and we will offer you the best after-sale service and timely delivery. We do everything we can to add value to our customers' experiences, allowing us to be their best option.

### Low Price Daily Necessities and Bathroom Accessories of Suppliers

We have been experienced manufacturer. Wining the majority in the crucial certifications of its market for Cheapest Factory China Factory Supply Silicone Single Bag Storage Box Bathroom Storage Box Cosmetic Single Hole Storage Bag Suction Wall Storage Box Wallhanging, We sincerely welcome abroad customers to consult to the long-term cooperation as well as the mutual advancement. Cheapest Factory China Wall Hanging and Bathroom Accessories price, We welcome you to visit our company, factory and our showroom displayed various solutions that will meet your expectation, meanwhile, it is convenient to visit our website, our sales staff will try their efforts to offer you the best service. If you require more information, make sure you do not hesitate to contact us by E-mail or telephone.

### Daily Necessities and Bathroom Accessories Introduction

Our METALLECA® Daily Necessities and Bathroom Accessories are manufactured by the press and die stamping, then using post processing and surface treatment has a certain aesthetic and high precision.

We will select reasonable surface treatment methods to improve the quality of the overall equipment according to the requirements for different needs, such as polishing, electroplating, oxidation, and so forth.

At present, most of the production of stamping pieces is aluminum and stainless steel.

### Daily Necessities and Bathroom Accessories Parameter (Specification)

Production process	Material	Strength	Application
stamping	ASTM 304/316 AL5052 AL1050 AL1035 Q235 Q345 08F	Simple structure, easy to deform No cracks and defects Dimensional precision accuracy High productivity Smooth and beautiful appearance Better interchangeability Light weight and high rigidity	Pipe buckle/clamp Bathroom accessories (floor drain cover) Instrumentation case household utensils (plates, bowls)

### Daily Necessities and Bathroom Accessories Feature And Application

The 60 to 70% steel plates are stamped into finished products in the world. For example, Car bodies, chassis, fuel tanks, radiator fins, boiler drums, container cases, motors, and Iron core silicon steel sheet for electrical appliances, etc.

They are all stamped and used in instrumentation, home appliances, bicycles, office machine, household utensils and other products.

Stamping parts are the production technology by using the power of general or special stamping equipment to directly deform sheet materials in the mold, and to obtain product parts with a certain shape, size and performance.

There are the three elements of stamping processing: sheet materials, molds and equipment.

METALLECA® Daily Necessities and Bathroom Accessories is a cold metal deformation processing. Therefore, it is called cold stamping or sheet stamping.

It is a method of metal plastic processing (or pressure processing). In addition, it belongs to material forming engineering technology.

### Product Details

Production Process: stamping + machining + surface treatment

Materials: aluminum alloy 5052、1050、1035

Stainless steel ASTM304/316

Carbon steel Q235 Q345

Other materials: copper alloy plate, nickel alloy plate, titanium alloy plate

Surface treatment: polishing, oxidation, electroplating, wire drawing

Surface requirements: customize

### Product Qualification
